- (b) to reduce as far as practicable the risks of personal injury, death, property damage and environmental harm arising from the transport of dangerous goods by land transport; and
- (c) to give effect to the standards, requirements and procedures of the ADG Code so far as they apply to the transport of dangerous goods by land transport; and
- (d) to promote consistency between the standards, requirements and procedures applying to the transport of dangerous goods by land transport and other modes of transport.

1.1.4 Dangerous situations

This subordinate instrument does not apply to the transport of dangerous goods by, or at the direction of, an authorised officer or an officer of an emergency service, to the extent necessary to avert, eliminate or minimise a dangerous situation.

1.1.5 Exempt transport

 - (c) the aggregate quantity of the dangerous goods in the load is less than 25% of a placard load; and
 - (d) the goods are not being transported by the person in the course of a business of transporting goods by road; and
 - (e) in relation to transport by rail — the goods are not being transported by the person on a passenger train.

1.1.6 Further exemptions

- (1) This subordinate instrument does not apply to the transport by road or rail or both rail and road of dangerous goods of UN Class 1 (explosives) or UN Class 7 (radioactive material) except when being transported with other dangerous goods.
- (2) This subordinate instrument does not apply to the transport by a vehicle by road or rail or both rail and road of dangerous goods:
 - (a) that are not UN Division 6.2 infectious substances and that are in a consignment where the aggregate quantity of dangerous goods is not more than the quantity set out in subclause (3)(a) of the note to section 1.1.1.2 of the ADG Code; or
 - (b) in the vehicle's fuel tank; or

- (1) Goods are *dangerous goods* if:
 - (a) the goods are determined under clause 1.5.1(1)(a) to be dangerous goods; or
 - (b) the goods satisfy the dangerous goods classification criteria set out, or referred to, in Part 02 of the ADG Code.
- (2) However, goods that satisfy the criteria set out, or referred to, in Part 02 of the ADG Code are not dangerous goods if the goods are:
 - (a) determined under clause 1.5.1(1)(a) not to be dangerous goods; or
 - (b) described as not subject to the ADG Code in a special provision in Chapter 3.3 of the ADG Code that is applied to the goods by column 6 of the Dangerous Goods List.

2.1.2 Goods too dangerous to be transported

Dangerous goods are too dangerous to be transported if they are:

- (a) goods set out or described in Appendix A to the ADG Code; or
- (b) goods determined under clause 1.5.1(2)(a) to be too dangerous to be transported; or
- (c) goods (other than goods mentioned in paragraph (a) or (b)) that are so sensitive or unstable that they cannot be safely transported even if the relevant requirements of this subordinate instrument and the ADG Code are complied with.

Note Section 83 of the Act provides that a person must not consign for transport goods that this subordinate instrument identifies as being too dangerous to be transported.

2.1.3 UN Classes, UN Divisions and Categories of dangerous goods

- (1) The UN Class, Division or Category of particular dangerous goods for the purposes of this subordinate instrument is:
 - (a) if a determination under section 1.5.1(1)(b) that the goods are of a particular UN Class, Division or Category is in effect in relation to the goods — the Class, Division or Category specified in the determination; or
 - (b) if no such determination is in effect — the Class, Division or Category determined for the goods in accordance with the ADG Code.

Note 1 Under the UN classification system there are 9 classes of dangerous goods. Under that system some Classes are further divided into Divisions, and some Divisions are divided into Categories.

2.1.4 Subsidiary hazard

Examples

UN Division 6.2 infectious substances are divided into:

- (a) Category A (substances transported in a form that, if exposure occurs, can cause permanent disability or life-threatening or fatal disease to humans or animals); and
- (b) Category B (others).

Note 2 Under the ADG Code, if particular dangerous goods are listed in the Dangerous Goods List, their UN Class or Division is that listed in column 2 of that list opposite the name and description of those goods, unless Chapter 3.3 of that Code provides for those goods to be assigned to a different Class or Division. If applicable, Chapter 2 of that Code describes how the UN Category of dangerous goods is to be determined. Once again the Category may be changed under Chapter 3.3 of that Code.

2.1.4 Subsidiary hazard

The subsidiary hazard, if any, of particular dangerous goods for the purposes of this subordinate instrument is:

- (a) if a determination under clause 1.5.1(1)(c) that the goods have a particular subsidiary hazard is in effect — the subsidiary hazard specified in the determination; or
- (b) if no such determination is in effect — the subsidiary hazard determined for the goods in accordance with the ADG Code.

Note Dangerous goods that are able to be assigned to more than one UN Class or Division are assigned a subsidiary hazard. This subsidiary hazard is the other UN Class/es or Division/s to which the goods also belong. Under the ADG Code, if particular dangerous goods are listed in the Dangerous Goods List, their subsidiary hazard is that listed in column 4 of that list opposite the name and description of those goods, unless Chapter 3.3 of that Code provides for those goods to be assigned a different subsidiary hazard.

2.1.5 Packing Groups

The Packing Group, if any, of particular dangerous goods for the purposes of this subordinate instrument is:

- (a) if a determination under section 1.5.1(1)(d) that the goods are of a particular Packing Group is in effect — the Packing Group specified in the determination; or
- (b) if no such determination is in effect — the Packing Group determined for the goods in accordance with the ADG Code.

Note The assignment of particular dangerous goods to a Packing Group indicates the degree of danger, and the level of containment required for, the goods. The Packing Groups, and the degree of danger they indicate, are:

- Packing Group I (substances presenting high danger);
- Packing Group II (substances presenting medium danger);
- Packing Group III (substances presenting low danger).

2.1.6 Incompatibility

The Packing Group of a substance can be determined from the Dangerous Goods List, although in some cases it is also necessary to refer to Chapter 3.3 of the ADG Code (the List identifies those cases).

2.1.6 Incompatibility

- (1) Dangerous or other goods are *incompatible* with dangerous goods if:
 - (a) the goods are incompatible under Chapter 9.1 of the ADG Code;
or
